Dear Sirs: Please reject out of hand the NAB's petition 04-160. I have been an XM subscriber for three years plus and have found the service to be of excellent quality with no nonsense or sexual crap. This is a free country based on democratic values and as such I do not want to be told what I can hear or not. XM fills an important niche in that distance and movement across the US do not degrade or impede my ability to listen to the stations I desire.

Thank you and God Bless America and our Soldiers.
